

# EPS FOAM RECYCLING AND PELLETIZING LINE

**Use:** this machine s used for EPS, XPS recycling and pelletizing, especially for sorting materials and transform rubbish into treasure. It' s an ideal choice for environmental protection of the supermarket and the utility areas.

**Features:** the machine adopt the fast compact, fast melting, extruding with filter, whole line design to recycle the material into granuales.

The hole diameter of stamped sieve plate can be custom-made according the user' s requirements.

TECHNICAL DATA:				
ITEM	LWG-SJP-160-90	LWG-SJP-185-105	LWG-SJP-220-120	LWG-SJP-250-135
Screw dia.(mm)	φ 160, φ 90	φ 185, φ 105	φ 220, φ 120	φ 250, φ 135
Long dia. ratio	4:1—8:1			
Output(kg/h)	60—90	100—150	150—180	200—250
Screw rotate speed(r/min)	560—65			
Power(kw)	15—5.5	22—7.5	30—11	45—15
